About NextGen

COTA's NextGen project is a long-range visioning effort to identify public transportation needs and opportunities in central Ohio for the next 10, 15, 25 years and beyond. The project will analyze how the region's growth trends will influence opportunities and demand for public transportation. NextGen will also identify – with extensive community guidance – transit investments and creative ways to pay for them.

All interested people are encouraged to attend and participate. Public participation is solicited without regard to race, color, religion, sex, age, national origin, disability or familial status.
